- IV. Follow instructions on video "Software Upgrade email.mp4" to upgrade software. PLEASE MAKE SURE THE MACHINE IS COMPLETELY OFF BEFORE PROCEEDING WITH THE PROCEDURES. FLIPPING THE SWITCH WHILE THE MACHINE IS ON CAN HAVE UNEXPECTED RESULTS.
  - a. After flipping the computer module switch and inserting the USB drive, turn on the machine. THESE STEPS ARE CRITICAL AS THE SYSTEM MUST START IN UPGRADE MODE. FAILURE TO FOLLOW THESE STEPS COULD LEAD TO SOFTWARE INSTABILITY AND INABILITY TO UPDATE PATCHES.
  - b. Go to the E drive by typing "e:" then press the "Enter" key. PLEASE VERIFY THE CORRECT VERSION ON YOUR MACHINE. UPGRADING TO AN INCORRECT VERSION MAY CAUSE AN UNSTABLE SYSTEM. PROCEED WITH CARE.
    - i. For version 1.1.8.63d30, type "uexen" then press the "Enter" key
  - c. Wait for the update to complete. The process should only take a few seconds.
  - d. After the update is successful, turn off the machine.
  - e. Remove the USB drive
  - f. Flip the switch on the computer module to its original position. THIS STEP MUST BE COMPLETED BEFORE YOU CAN OPERATE THE MACHINE AFTER THE UPGRADE.
